

About

solar2

We are an independently family-owned UK renewable energy developer with offices across England, Wales and Scotland. The team has been operating in the renewable energy sector since 1996, originally as West Coast Energy (WCE).

The founders of Solar2, together with the wider team, have a strong track record in the successful development of renewable projects throughout the UK, being responsible for the delivery of in excess of 1GW of renewable energy.

It is important to us that our sites maintain an agricultural use and enhance the local environment, and that we engage and listen to the local community throughout the planning process.

We are a responsible, considerate developer. As such, we are proposing a suite of measures to improve the local environment, by providing wildflower meadow planting, upgraded animal habitats, and achieving a Biodiversity Net Gain, for the Lewknor site.

RECURRENT ENERGY

A subsidiary of Canadian Solar

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms. With an industry-leading team of in-house energy experts, we are a wholly owned subsidiary of Canadian Solar Inc. and function as Canadian Solar's global development and power services business. Recurrent Energy has completed the development of 10 gigawatts (GWp) of operating utility-scale solar projects and 3.3 gigawatt hours (GWh) of energy storage projects across six continents. Recurrent Energy have more than 26 GWp of solar and 56 GWh of battery storage projects under development.
